ROEUN SAOLY

STUDENT

COVER LETTER

Dear, Sir/Madam

- My name is Roeun Saoly. I'm 19 years old. I was born in Battambang province but now live in Phnom Penh city. So far, I have passed the 3rd-best physics student exam in Battambang, and I have the 2023 Baccalaureate exam with a B score. I'm a student studying at the Royal University of Phnom Penh as a department engineer majoring in information technology engineering.
- In this major, I must study more about code for basic programming languages such as C/C++ and basic web design. Not only that, there are many subjects that I study there also, such as Math, Physics, Civilization, Academic Skills, and other subjects. Moreover, when I'm studying at university, I need to try to study harder than I studied in high school to get more knowledge and develop my talent, because this major requires students to research more on the internet to solve any problems that arise in assignments by yourself.
- In the future, I want to be a Full Stack Web Developer, because I think websites are very popular and it's very important in modern society that we can research on the internet. We can use the website for business, research more information, and study here also because it's free for people around the world.

I hope me is your choice for choosing to work because I really interested with your company. And I really like working, Because I can studying or learning the new things in my work and more I can communicate with the people around me, and making my talent better than before. In addition, I can getting the new experience in working also.

Thank you for taking the time to consider my application. I am looking forward to hearing from you.

Sincerely, by Roeun Saoly.
